STAGES RALLY

ROAD

BOOK

SATURDAY 17th FEBRUARY 1990

Everquip

Welcome to the 1990 Everquip Stages Rally, the organising committee hope you have a good days Motorsport. We plan to run a minimum of EIGHT and a Maximum of TEN Special Stages.

TIME SCHEDULE

Time for car 0

MTC 1 = 09.25

ATC 2 = 10.10

The due time of car 0 at the other stage arrival controls will be given to each competitor as they complete the previous stage, and posted on the official notice board.

The official notice board will be sited in the documentation room until the last car completes the last stage, when it will move to the Charter House.

TIMING

As explained in the final Instructions, all stages will start at 30 second intervals, and all will be lapped. Each stage will be preceded by a time control. A time for car 0 will be given, to calculate your own due time, half your start number and add it to the time for car 0, if this works out to a half minute, you should use the preceding whole minute

For Example

Time for car 0 = 09.25

Time for car 7 = 09.25 + 3½ = 09.28½ i. e. preceding whole minute = 09.28

Time for car 40 = 09.25 + 20 = 09.45

This means that two cars will be due at the time control on the same minute.

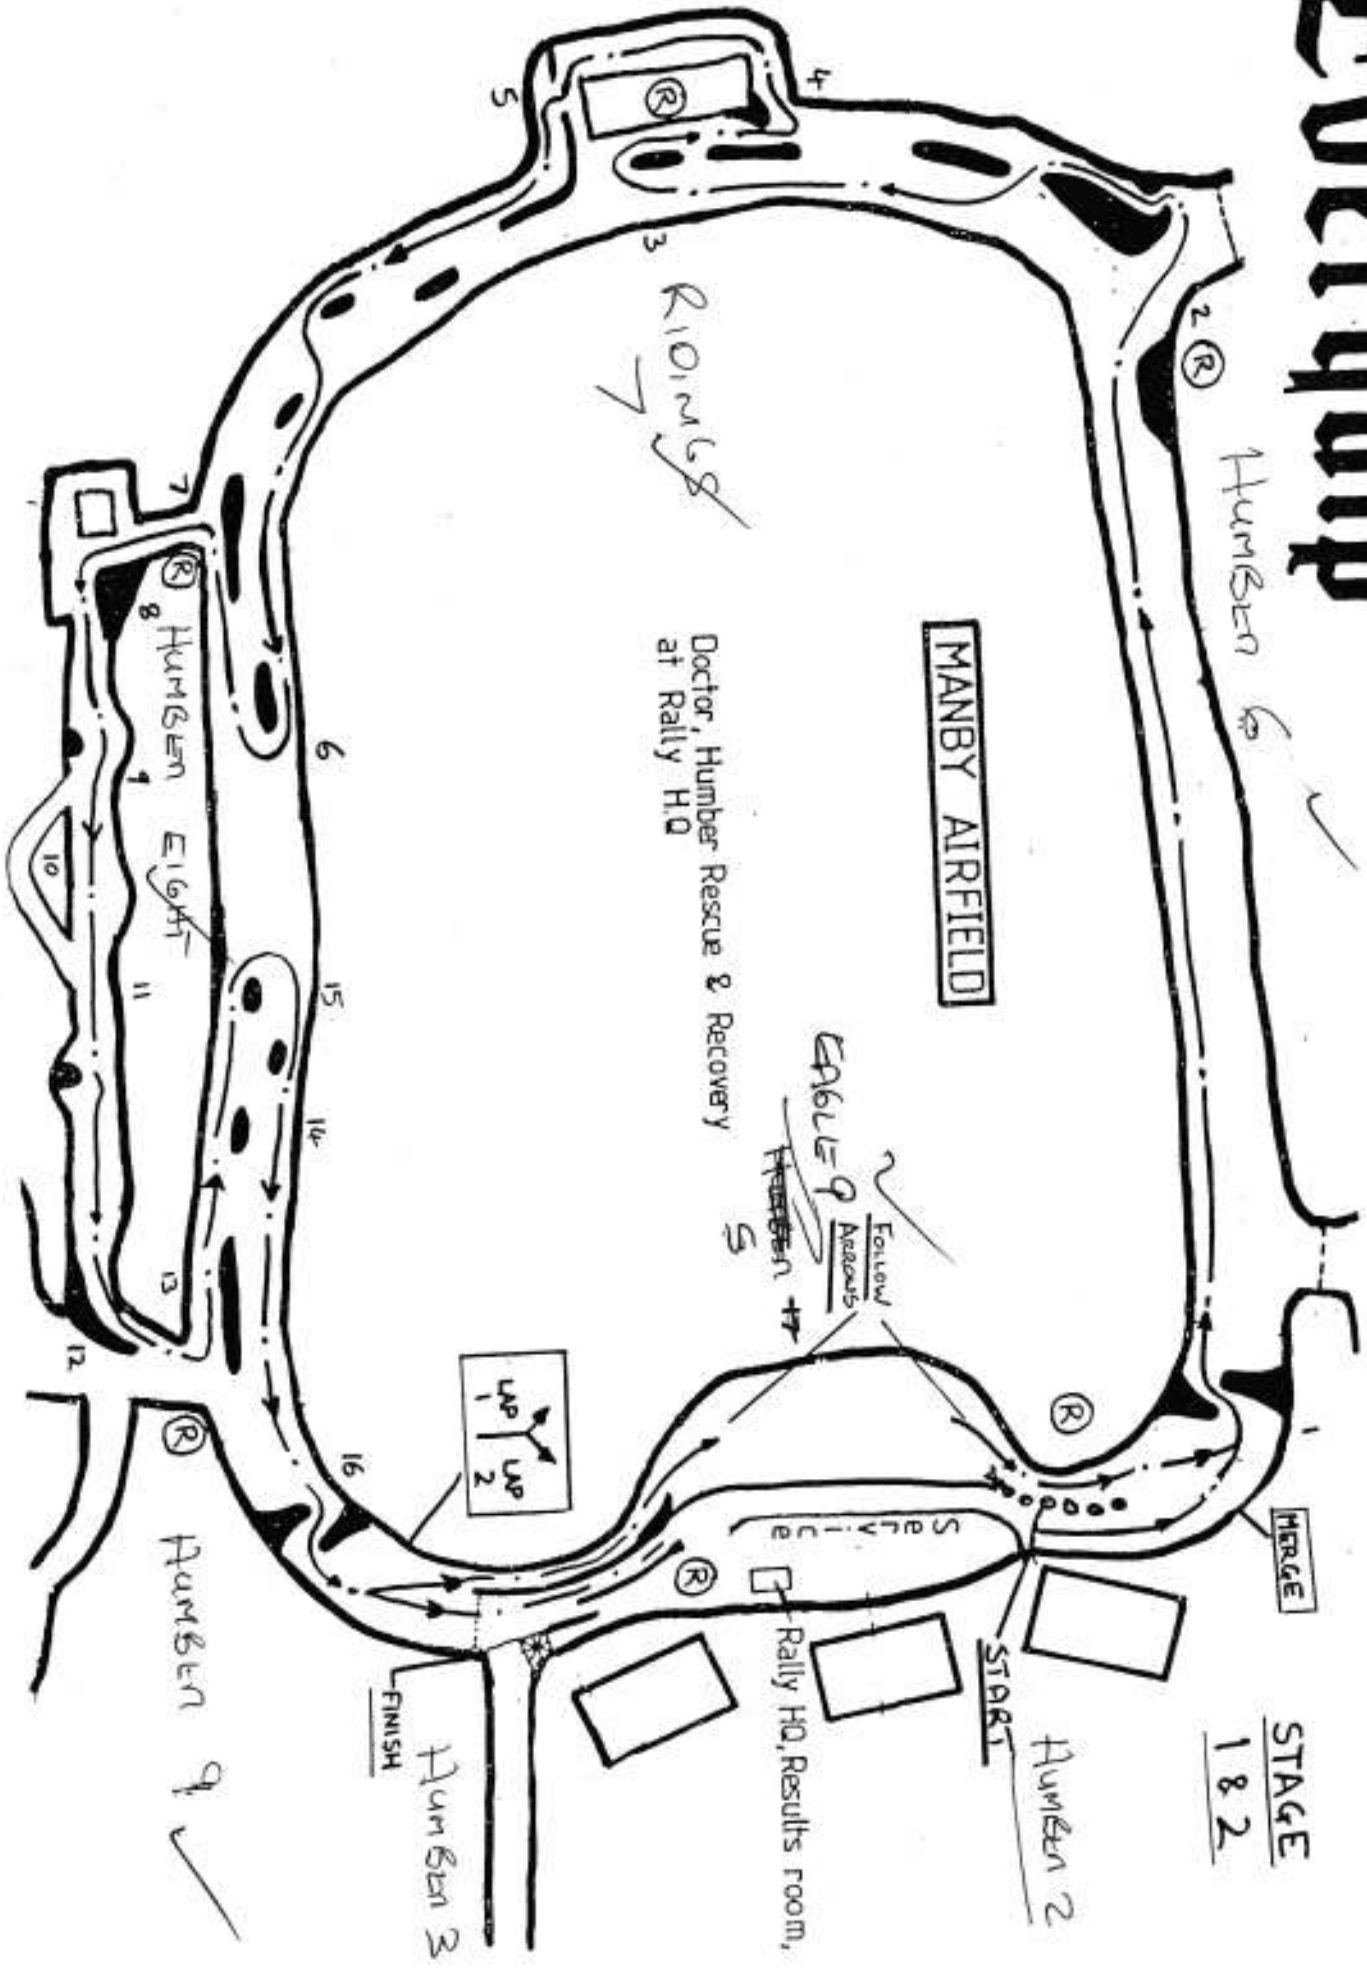

The maximum lateness allowed is 15 minutes.

STAGE MILEAGES AND TARGET TIMES

STAGE NO	MILAGE	TARGET TIME (mins)
SS 1 & 2	6.1	6m 6s
SS 3 & 4	5.05	5m 3s
SS 5 & 6	5.4	5m 24s
